PROFESSIONAL SUMMARY

B.Tech Artificial Intelligence and Machine Learning student with hands-on project experience in Python, machine learning, multi-agent AI systems, and software deployment. Experienced in building AI-powered applications and working with Flask, Docker, Kubernetes, automated testing, and CI/CD workflows. Interested in software engineering, AI-driven systems, and cloud security.

EDUCATION

Sri Shakthi Institute of Engineering and Technology — Coimbatore, India
B.Tech Artificial Intelligence and Machine Learning — *2024 – 2028*

Perks Matriculation Higher Secondary School — Coimbatore, India
Higher Secondary — *2023 – 2024*

PROJECTS

AI-Powered Network Log Analysis, Anomaly Detection & Incident Reporting System

- Built a machine-learning-based network anomaly detection system using the UNSW-NB15 dataset.
- Integrated specialized AI agents for threat classification, risk scoring, incident analysis, and recommended security actions.
- Developed a Flask dashboard with database-backed incident logging and model tracking using MLflow.
- Integrated Pytest, Docker, Kubernetes, and GitHub Actions to support testing, deployment, and CI/CD.

Mini Multi-Agent AI Decision System

- Developed a multi-agent AI system using LLMs and Retrieval-Augmented Generation (RAG) for information retrieval and analysis.
- Implemented vector-database retrieval and agent collaboration to generate context-aware outputs.
- Technologies: Python, LangChain, RAG, Vector Databases, LLMs, Multi-Agent Systems.

Authenticity Validator for Academia

- Developed an AI-powered application to analyze academic content for authenticity, inconsistencies, and potential plagiarism indicators.
- Built an interactive Streamlit interface to process documents and generate validation reports.
- Technologies: Python, Machine Learning, NLP, Streamlit.

TECHNICAL SKILLS

- **Programming: Python, SQL**
- **Computer Science: Data Structures and Algorithms, DBMS, Operating Systems, Computer Networks**
- **AI/ML: Machine Learning, Deep Learning, NLP, Generative AI, LLMs, RAG, Multi-Agent Systems**
- **Development & Deployment: Flask, Git, GitHub, Docker, Kubernetes, MLflow, Pytest, GitHub Actions**
- **Tools: VS Code, Jupyter Notebook**

INTERNSHIPS & JOB SIMULATIONS

- **Machine Learning Intern — Future Interns:** Machine learning, data analysis, and model development
- **AI Intern — CodSoft:** AI-related tasks and practical project development
- **Research Job Simulation — JPMorgan Chase & Co. (Forage):** Research-oriented analytical and problem-solving tasks.
- **Generative AI Job Simulation — BCG X (Forage):** Practical tasks involving Generative AI concepts and applications.

CERTIFICATIONS & ACHIEVEMENTS

- **NCC ‘B’ Certificate — A Grade**
- **NCC Sergeant (SGT):** Leadership, discipline, teamwork, and responsibility.
- **RDC TRG-1 Selection:** Selected for Republic Day Camp Training under NCC.
- **SATKAM Online Course:** Artificial Intelligence and emerging technologies *(include if completed and certified)*.
- **Hackathon Participation:** Bharatiya Netriksh Hackathon; GCD College Hackathon — Good for Tech.
